

Risk Escalation Map

PURPOSE

Process for reporting and mitigating algorithmic risks. Defines triggers, escalation hierarchy, and incident response protocol.

1. Score Thresholds & Automatic Actions

Score Range	Risk Level	Automatic Action
0–30	Low	Standard underwriting — no escalation required
31–55	Moderate	File review recommended — insurer notified via response flag
56–75	High	Field verification advised — flag raised in API response
76–100	Extreme	MANDATORY human decision — automated processing blocked

2. Escalation Triggers

Trigger	Who Detects	Action
Score > 75	API (automatic)	Block automated decision, notify underwriter
Confidence < 0.5	API (automatic)	Add warning flag to response
Geocoding failure	API (automatic)	Return error + address suggestions
False negative reported	Insurer via POST /api/v1/feedback	Open investigation J+2
Model drift (>10% score shift)	CTO monthly review	Trigger emergency recalibration
Data source outage (GEE, CHIRPS)	Prometheus monitoring	Fallback to cached features + low-confidence flag

3. Incident Response Protocol

Timeline	Action	Owner
J+0	Insurer reports incident via API or email	Insurer
J+2	CTO opens investigation — root cause analysis begins	Babacar Ndao, CTO
J+5	Preliminary report: model error vs insurer decision error	Babacar Ndao, CTO
J+15	Final root cause report with supporting satellite data	Babacar Ndao, CTO
J+30	Corrective patch deployed + recalibration if systemic	Dëkkal Team

Timeline	Action	Owner
J+30	All clients notified if error is systemic	Aminata Sall, CEO

4. Escalation Hierarchy

Level	Trigger	Owner	Response Time
Level 1 — Automatic	Score flags, confidence warnings	API	Immediate
Level 2 — Insurer Analyst	Scores 56–100	Insurer Risk Analyst	Same day
Level 3 — Dëkkal CTO	Systemic errors, model drift, data failures	Babacar Ndao	< 48 hours
Level 4 — Dëkkal CEO	Regulatory escalation, CIMA audit	Aminata Sall	< 72 hours

5. Liability Cap

Dëkkal's financial liability is capped at 12 months of contract value per confirmed scoring error. All final underwriting decisions remain the sole responsibility of the insurer.
